

OUR CLIENTS

"ProtoTech Solutions has proven to be an invaluable technology partner to TS3D. Given their expertise with building 2D/3D engineering applications they've been able to produce great new capabilities for HOOPS, as well as provide high-level consulting, training and custom development to many of our customers."

*Ron Fritz, Managing Partner
Tech Soft 3D*

"After deciding to set up an offshore development center in India, Vikas Saxena wanted to quickly build expertise in 3D application development. Our interactions with Prototech helped us in the areas of visualization to rapidly build a team with advanced 3D graphics programming ability."

*Vikas Saxena, Head Software Development
Renishaw Meterology Systems*

ABOUT US

**Develop Your Ideas Into
Shipping Applications.**

PTS provides fast and reliable, technical expertise to help companies develop software products.

We form strong partnerships with our clients to help them transform their ideas into reality.

Our services help companies accelerate their technology and evolve their products to the next level without draining their own in-house resources.

TRANSFORM YOUR TECHNOLOGY

OUR WORK IS GUARANTEED!

PTS is the first company to provide a money-back guarantee for your outsourced projects. If you are not satisfied with the software we deliver, you get all your money back.

BENEFITS

Innovative Solutions

Keep your company on the leading-edge of its industry.

Responsive Service

Know that your product will be delivered in a timely and effective manner.

Quality Results

Exceed your own expectations using our expert programmers.

Reliable Partnerships

Increase your company's productivity without straining your own development program.

Mirror Development Site

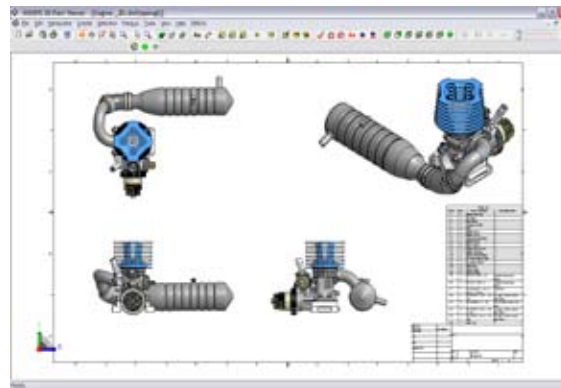

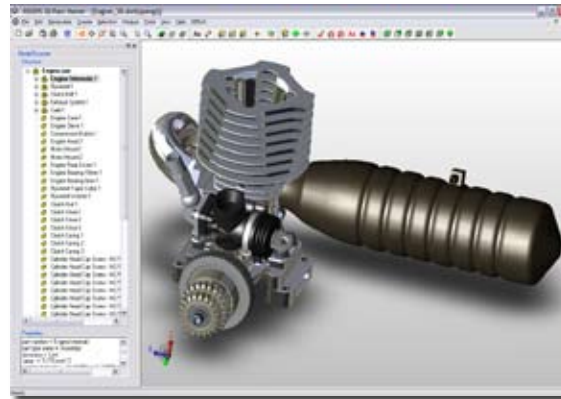

Keep your own processes and we will adopt them.

Transparent Outsourcing

Have a seamless integration with a company that works behind the scenes to make your R&D team look larger, faster and more advanced.

SAMPLE PROJECTS

Autodesk (data import to HSF from DWF)

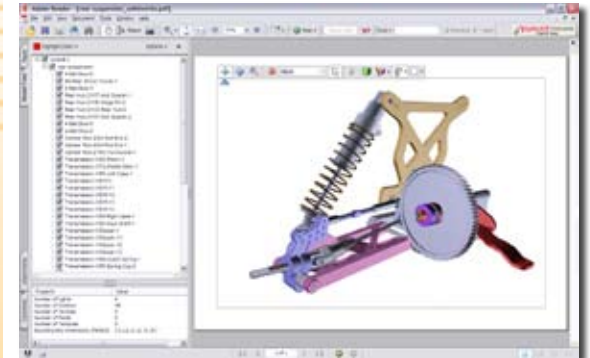

Import to HSF from DWF File. Model Courtesy of Autodesk.

DWF is Autodesk's design web format. This project was particularly challenging because it involved dealing with a couple of sub-formats (2D and 3D) within DWF and further required us to support both import and export.

U3D (data export to 3D PDF from HSF)

Export to 3D PDF from HSF. Model courtesy of SolidWorks.

3D PDF file in Acrobat Reader. This file is generated from HOOPS scene graph. Model courtesy of SolidWorks.

U3D (Universal 3D) is an upcoming 3D visualization standard promoted by companies such as Intel and Adobe. The universal PDF format uses U3D specs to store 3D content. This software is now used by SolidWorks to export their files to 3D PDF.
